

Hurricane Evacuation Update

Charlie Kilpatrick, P.E.
Chief Deputy Commissioner
September 17, 2013

Model Update

- *Updated to reflect a new limited access Route 460 (with contraflow)*
- *Model reflects U.S. Army Corps of Engineers suggested standards for inundation and evacuation response*
- *Model assumptions*
 - *Contraflow along U.S. 58 in Chesapeake/Suffolk*
 - *Incident free conditions*

Hurricane Inundation

Model Results

Benefits of a new U.S. 460 - Hurricane Evacuation -

- *Evacuates 153,000 citizens from the Hampton Roads region*
- *Carries ~ 31,000 more evacuees than existing Route 460*
- *Reduces evacuation time*
- *Provides a redundant facility to Interstate 64 when incidents occur*
- *Reduces reliance on water crossings*

Benefits of a new U.S. 460 - Post-Storm Recovery -

U.S. Route 460, September 22, 1999, Zuni, Virginia
