

# **The Revenue Outlook for the Commonwealth Transportation Fund**

## **A Presentation to the Commonwealth Transportation Board**

October 15, 2008

## ***The August alternative forecast favored by half the members of GACRE calls for a three quarter recession...***

- In the Virginia alternative low-growth forecast, a deeper housing recession, higher oil prices, and deteriorating conditions in financial markets result in a more protracted economic slowdown in Virginia.
  - ♦ Employment declines 0.6 percent in fiscal year 2009 and stagnates in fiscal year 2010, similar but still slightly better than the last recession.
    - The construction and financial activities sectors are expected to suffer significant declines in fiscal year 2009.
    - Gains in the service sector are expected to continue.
  - ♦ Both personal income and wages and salaries are over one-half a percentage point below the standard outlook for this fiscal year and next, increasing about 3.0 percent per year over the next two years.
