

# ***March 2010 CTB Meeting***

8B8

**0064-003-623, C501**

**Alleghany County**

This project will reconstruct the inside shoulders and install High Tension Cable Guardrail in the median of I-64 and between Westbound I-64 and Winterberry Avenue/Irvine Farm Road. It will also update and improve the drainage system within the project limits. In addition, all existing substandard guardrail along the project will be updated and the pavement will be resurfaced. At least one lane of traffic will be maintained in each direction on I-64 throughout the duration of the project. Existing entrances and connections will be maintained during construction. This project significantly improves safety for users on I-64 and adjacent roadways by preventing the likelihood of a cross-over collision. In addition, this design incorporates high-tension safety fence that redirects vehicles in a milder manner than other barriers at the same test levels while simplifying maintenance procedures.

Fixed completion December 19, 2011

6B4

**0630-089-596, C501, B612**

**Stafford County**

The purpose of this project is to replace the existing Route 630 Bridge over the CSX Railroad. The new bridge and associated alignment will be shifted to the north of its current location to allow the existing bridge to remain in service during construction. The horizontal and vertical geometry will be brought up to standards as a result of this project.

Fixed completion September 15, 2011

D43

**BRDG-963-055, N501**

**Lynchburg District**

This project will provide a contract for lining structurally deficient culverts on the off system with smooth walled steel liners on nineteen (19) culverts. This work will not change the basic geometrics of any of the culverts included in the contract. This culvert rehabilitation work will prolong the life expectancy of each culvert that is addressed under this contract. The traveling public should not be inconvenienced by this work.

Fixed completion December 16, 2010

**Waxpool Road (94639)  
0625-053-972, P101, C501**

**Loudoun County**

This Project is located in Loudoun County, Virginia, and includes the construction of turn lane improvement on all four legs of the intersection of Waxpool Road (Rte 625) and the Loudoun County Pkwy (Rte 607) and modification or reconstruction of the existing traffic signal to accommodate the proposed lane configuration. The total Project length is approximately 1.0 mile.

This Project includes, among other things: (a) completing design, (b) coordinating and performing, or causing to be performed, required utility adjustments, (c) performing roadway construction and drainage adjustments, (d) providing quality assurance and quality control for design and construction, and (e) providing overall project management.

Fixed completion December 7, 2010

## **Bid from January 27, 2010**

D22

**0820-082-339, M501**

**Rockingham County**

The purpose of this project on Bergton Road is to stabilize the failing embankment, to widen the shoulders and reconstruct and improve the geometrics of the roadway. Within the 0.824 mile limits of the project, the existing alignment has many sharp, substandard reverse curves with approximately 1-2 foot substandard graded shoulders and virtually no ditch. This section of Route 820 is unique to most other sections of the road in that it is on the side of a mountain. On the north side there is a near 90 degree vertical, 20-25 foot high rock cut slope. On the south side is a 50-75' high 1:1 embankment with the North Fork of the Shenandoah River at the base. The embankment is beginning to show signs of failure. The road is bordered by National Forest property along most of the project limits. It currently carries 1300 vehicles per day with 7% trucks. The new roadway will consist of 2 - 11' lanes with 4' graded shoulders. The cut slope along the roadway will remain steep due to rock, varying from 0.5:1 to 1:1. Lane closures with flagging will be required throughout most of the project construction in order to excavate and install soil nails. Blasting may be required which would result in longer delays.

Fixed completion November 30, 2010

## **Bids by Others**

**0501-118-R07, C501, B602**

**City of Lynchburg**

This project is for rehabilitation and enhancement of the Rivermont Avenue Bridge over Blackwater Creek on Rivermont Avenue (Route 501) near the intersection with 5<sup>th</sup> Street. This project includes construction of a deep overlay on the existing concrete deck, median replacement, concrete substructure repairs, installation of new metal railing, installation of new light supports, cleaning and painting of steel girder bearings and ends, concrete staining, deck joint reconstruction, drainage system repairs, roadway modifications, and maintenance of traffic during construction.

**U000-100-717, N501**

**City of Alexandria**

This project is funded with American Recovery and Reinvestment Act (ARRA) allocations that were distributed to the City of Alexandria through VDOT and the MPO. The project will be used to purchase 4 trolleys for the City's Fleet which will be used in the King Street area. To save time, the City found an existing contract, Lynx #09-C05, through the Central Florida Regional Transportation Authority that had been federally procured. The City has been in contact with the CFRTA and they have agreed for the City of Alexandria to ride this

contract. The project costs are anticipated to be \$2,540,000 ( $\$635,000 \times 4$ ). Currently there is \$2,400,000 in ARRA funds allocated to this project. The overage of \$140,000 will be paid for by 100% City funds.
