Subject: Approval of Limited Access Control Change (LACC) for Jones Branch Connector, County of Fairfax

Dear Commonwealth Transportation Board Members:

The Department requests your consideration of changes in the limited access control along both sides of the Jones Branch Connector east of Jones Branch Drive. This project also requires a break in the existing limited access control line along the north bound lane of I-495 where the proposed limited access control lines will extend along both sides of the proposed Jones Branch Connector extension to Capitol One Drive North.

The Department's staff has determined that the proposed changes in limited access control for public street purposes is viable from a design, safety and traffic control standpoint, and is being recommended by the Department. I have reviewed the staff's recommendations and determined that approving this break in the limited access control will not adversely affect the safety or operation of the affected highway network. I have determined that this request should be considered by the Board.

Sincerely,

for Garrett W. Moore, P.E.
Chief Engineer
